trevira[®]
CS eco

Key Features

Trevira CS eco makes Trevira CS articles become even more environmentally conscious with the aid of various recycling processes.

Numerous recycled fiber and yarn solutions are available that are eligible to be granted the brand name Trevira CS eco.

Properties

- Inherent, permanent flame-retardancy as a result of controlled modification of the polyester molecule
- No flame-retardant protection loss through frequent washing or ageing
- Permanently flame-retardant without additional finishing agents
- Easy care, low-crease, & dimensionally stable
- High colour brilliance, & fastness to light
- High resistance to rub
- Compatible with skin
- Short wash cycles at low temperatures – saving water, detergent, and energy

Safety Standards

- **Trevira CS eco** fabrics and articles are trademark tested and approved
- Recycled and flame-retardant fibers & yarns are GRS certified
- Only have slight development of fumes in the event of fire.
- Compliant with important international fire safety standards like EN 13772 + 13773, DIN 4102, NF P 92503-507/M1.

Trevira CS eco's suitability

- Curtains & drapes
- Wall coverings
- Upholstery fabrics
- Interior sun protection
